Economic Outlook and Investment Strategy

Special Coronavirus Crisis Edition
Economic and Financial Indicators

Indicators are now signaling a recovery from the COVID-19 crisis is underway.

Source: City National Rochdale. As of July 2020.
Recovery Underway, but Full Recovery Will Take Time

- Phased reopening driven by states. Expect sizeable initial GDP gains in 2H 2020, before growth moderates.
- Recovery in demand expected to be constrained until virus fears fade and social distancing rules are reduced.
- Full normalcy not until 2021. Better therapeutic treatments and/or vaccine creation will be essential.
- Resurgence in infections is the leading downside risk, but a return to widespread lockdowns is unlikely.
- Policy responses from Washington/Fed have been massive and well targeted, but more needed.

Actual client portfolio target cash allocations will vary. As of July 2020.
Economic Activity Improving, But Remains Depressed

- Signs of recovery in numerous macro indicators
- Despite these green shoots, most economic data remains at historically depressed levels
When will GDP fully recover?

Our current outlook suggests full recovery will not happen until late 2021 at the earliest.

Potential US GDP Path

Source: CNR Research.
COVID-19 Resurgence Likely to Slow Recovery, Not Derail It

- High frequency indicators suggest the economic recovery has slowed recently with the resurgence in virus infections and renewed restrictions
- Pause in reopening means a lull in the upward economic recovery until new outbreaks are contained

- Rise in cases and hospitalizations, but fatalities projected to remain well below levels seen in April
- Better hospitalizations capacity and treatment progress improves mortality rate

Actual data from The COVID Tracking Project supplemented by hospitalization estimates from covidactnow.org where data was missing.
Strong Policy Response Drives Recovery

- Monetary and fiscal policy actions have been effective
- Bridge for companies to get through the shutdowns and rehire workers

U.S. Federal Reserve and European Central Bank Balance Sheet Assets

Source: Bloomberg.
Strong Jobs Gains, but Unemployment Still Historically High

- Continued high unemployment requires further government spending
- Companies have hired back many workers temporarily laid off
- Increase in permanent job losses shows a potentially longer-term employment impact

Unemployment Rate

- April: 14.7%
- June: 11.1%

Temporary vs. Permanent

- 18 million Temporary Layoffs
- 11 million Permanent Job Losses
- 2 million
- 3 million

Hourly Workers Working vs. Pre-Crisis

Source: Bloomberg and Homebase.
Consumers Better Positioned For This Downturn

- Spending is now less than 10% below pre-crisis levels
- Consumers are willing and able to make major purchases
- Household debt had been decreasing since the financial crisis

Source: Bloomberg, Opportunity Insights.
Housing Activity Is Showing Strength

- Pending home sales up significantly in May vs. April
- Consumers are willing and able to make major purchases

Pending Home Sales vs. 1 Year Ago

Source: Bloomberg.
Global Synchronized Downturn

- COVID-19 has delivered an unprecedented shock to the global economy, with most major and emerging economies falling into recession over the first half of 2020

IMF GDP Forecasts

Source: IMF.
We expect real returns to be moderate, with higher volatility over the next few quarters.
CNR Progress Playbook

Investment Committee considering:

- Additional fiscal stimulus required $1 to $1.5 trillion by end of July. More to follow.
- Government financial market support via buying bonds and sustaining low interest rates.
- Economic recovery could pause for the next few weeks but reopening will continue.
- Growth stocks fully valued on 2021 earnings.
- Interest rates likely to remain low for several years.
- Economic reopening will continue with some modifications to behaviors.

- Still high uncertainty as to S&P 500 earnings in 2021.
- Companies’ earnings are key to sustaining current equity levels and depend on reopening trends.
- Attractive opportunities in high dividend yielding and high income opportunistic bonds.
- Government intervention likely for the rest of the year to bridge economic hardship.

2008-2009 Financial Crisis
Decade Following Financial Crisis
2020 YTD
20 Years

Low Interest Rate Bonds < High Dividend Yield Stocks

High dividend stocks provide favorable income amid low interest rates

Yield Comparison
High Dividend Stocks vs. Investment Grade Bonds

Source: FactSet.
Non-investment Grade Yields are Favorable

- Investment grade corporate bond yields have reverted to below pre-crisis levels
- Potential opportunities for added income and return in non-investment grade

Yields: Current vs. Pre-Crisis

Opportunities and Risks in the Municipal Markets

**Investment Grade Muni**

**What we like:**
- High quality state governments
- Essential service revenue bonds
- Cities supported by CARES Act

**What we don’t like:**
- States with severely underfunded pensions
- Higher education reliant on foreign students
- Bonds backed by user fees (e.g., dorms, parking facilities, stadiums, toll roads)

**High Yield Muni**

**What we like:**
- Regional hospital systems deemed “essential”
- Tobacco settlement bonds
- Certain community development districts

**What we don’t like:**
- Certain senior living facilities
- Small private higher education
- Alternative energy

Economy Recovery Underway, but Headwinds Remain

City National Rochdale U.S. Economic Monitor

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Status</th>
<th>Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>Leading Indicators</td>
<td>Leading indexes suggesting the U.S. economy is already beginning to recover from COVID-19 recession.</td>
<td>5.5</td>
</tr>
<tr>
<td>Labor Market</td>
<td>As state economies reopen, we expect the unemployment rate to drop back faster than it would in a normal recovery, since many workers will be recalled from temporary layoffs, but a full recovery of job losses may take several years.</td>
<td>5.0</td>
</tr>
<tr>
<td>Consumer Spending</td>
<td>Although spending should rebound quickly as economies reopen due to pent up demand and higher savings, it could take a long time to return to its previous trend due to lingering uncertainty and social distancing restrictions.</td>
<td>5.5</td>
</tr>
<tr>
<td>Global Economic Growth</td>
<td>Amid massive policy response and an easing of COVID-19 lockdowns, the global economy is showing nascent signs that the worst of the COVID-19 shock is behind us. However, recovery is likely to be slow and uneven across regions.</td>
<td>3.5</td>
</tr>
<tr>
<td>Monetary Policy</td>
<td>Swift and decisive action by the Fed has been unprecedented in scale, helping to improve liquidity and stabilize markets.</td>
<td>9.0</td>
</tr>
<tr>
<td>Fiscal Policy</td>
<td>Policy response has been massive and well targeted, but more is needed. Total stimulus passed this year could rise to $4tn or 20% of GDP.</td>
<td>8.0</td>
</tr>
<tr>
<td>Consumer Sentiment</td>
<td>Confidence measures of current conditions posting record declines, but improvements expected. Full recovery in confidence unlikely until health and safety concerns can be fully addressed.</td>
<td>5.0</td>
</tr>
<tr>
<td>Credit Availability/Demand</td>
<td>Despite lower interest rates and policy intervention, economic uncertainty is reducing both the willingness and ability to lend and borrow.</td>
<td>5.5</td>
</tr>
<tr>
<td>Geopolitical Risks/Contagion</td>
<td>Coronavirus pandemic is adding to a long list of worries, including trade policy missteps, European political/financial system stability, energy production disputes and other unforeseen circumstances have the potential to disrupt markets and shake confidence.</td>
<td>3.5</td>
</tr>
<tr>
<td>Business Investment</td>
<td>Already weak capex spending set for further sluggishness in face of uncertain economic backdrop, lower demand, business closures and declining capacity utilization.</td>
<td>3.5</td>
</tr>
<tr>
<td>Service Sector</td>
<td>Survey measures are pointing to a snap back in activity as state economies reopen, but lingering social distancing measures, continuing uncertainty/fear surrounding COVID-19, and recent infection resurgence will slow recovery for extended period.</td>
<td>5.0</td>
</tr>
<tr>
<td>Manufacturing Sector</td>
<td>Sector showing beginning signs of stabilization/improvement, but recovery will be sluggish in face of reduced global demand and stronger dollar, as well as continued trade uncertainty.</td>
<td>4.0</td>
</tr>
<tr>
<td>Housing</td>
<td>Sector has been one of the bright spots recently supported by strong fundamentals, including low mortgage rates. Activity should improve as lockdowns ease and rising household financial uncertainty begins to abate, but lenders are battling economic uncertainty by raising standards and even eliminating certain loan types.</td>
<td>6.0</td>
</tr>
<tr>
<td>Inflation</td>
<td>Core inflation is likely to remain muted for the next several years, although we think the risk of a slide into a widespread deflation remains low.</td>
<td>7.5</td>
</tr>
<tr>
<td>Energy</td>
<td>Damage in energy sector from the collapse in oil prices starting to increasingly offset positive tailwind to households.</td>
<td>5.5</td>
</tr>
</tbody>
</table>

Total Score                                                                 5.5  

Incoming data has been better than expected, but the recent resurgence of virus infections is a reminder that the road to recovery will be long and bumpy.

Our Asset Allocation Positioning

EQUITIES
- Prefer U.S. to international markets
- Europe and Japan have significant structural issues
- Emerging markets: Favor Asia

CORE FIXED INCOME
- Low return potential
- Prefer corporate credit over government bonds
- Municipals attractive for high-bracket investors

OPPORTUNISTIC INCOME
- Opportunities in structured/distressed credit, emerging market high yield

REAL ASSETS
- Modest exposure for diversification benefits
- Underweight due to low-inflation environment

Source: City National Rochdale. As of July 2020.
An asset allocation program cannot guarantee profits. Loss of principal is possible.
Index Definitions

The Standard & Poor's 500 Index (S&P 500) is a market capitalization-weighted index of 500 common stocks chosen for market size, liquidity, and industry group representation to represent U.S. equity performance.

MSCI Emerging Markets Asia Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the Asian emerging markets.

The MSCI EAFE Index (Europe, Australasia, Far East) is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. & Canada. As of June 2007, the MSCI EAFE Index consisted of the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom.

The MSCI Europe Index is a free float-adjusted market capitalization index that is designed to measure developed market equity performance in Europe. As of September 2002, the MSCI Europe Index consisted of the following 16 developed market country indices: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

The MSCI World is a market cap weighted stock market index of 1,655[1] stocks from companies throughout the world. The components can be found here,[2] It is maintained by MSCI, formerly Morgan Stanley Capital International, and is used as a common benchmark for 'world' or 'global' stock funds intended to represent a broad cross-section of global markets.

The Michigan Consumer Sentiment Index (MCSI) is a monthly survey of U.S. consumer confidence levels conducted by the University of Michigan. It is based on telephone surveys that gather information on consumer expectations regarding the overall economy.

The Barclays Aggregate Bond Index is composed of U.S. government, mortgage-backed, asset-backed, and corporate fixed income securities with maturities of one year or more.

The Barclays High Yield Municipal Index covers the high yield portion of the U.S.-dollar-denominated long-term tax-exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds, and pre-refunded bonds.

The Bloomberg Barclays U.S. Treasury Index is an unmanaged index of prices of U.S. Treasury bonds with maturities of one to 30 years.

The Bloomberg Barclays U.S. Corporate Bond Index is an unmanaged market-value-weighted index of investment-grade corporate fixed-rate debt issues with maturities of one year or more.

The Bloomberg Barclays U.S. Corporate High Yield Index is an unmanaged, U.S.-dollar-denominated, nonconvertible, non-investment-grade debt index. The index consists of domestic and corporate bonds rated Ba and below with a minimum outstanding amount of $150 million.

The Bloomberg Barclays Emerging Markets USD Aggregate Index tracks total returns for external-currency-denominated debt instruments of the emerging markets. Countries covered are Argentina, Brazil, Bulgaria, Ecuador, Mexico, Morocco, Nigeria, Panama, Peru, the Philippines, Poland, Russia, and Venezuela.

The Bloomberg Barclays U.S. Agency Bond Index is a rules-based, market-value-weighted index engineered to measure investment-grade agency securities publicly issued by U.S. government agencies. Mortgage-backed securities are excluded.

S&P Leveraged Loan Indexes (S&P LL indexes) are capitalization-weighted syndicated loan indexes based upon market weightings, spreads, and interest payments. The S&P/LSTA Leveraged Loan 100 Index (LL100) dates back to 2002 and is a daily tradable index for the U.S. market that seeks to mirror the market-weighted performance of the largest institutional leveraged loans, as determined by criteria. Its ticker on Bloomberg is SPBDLLB.
Index Definitions (continued)

The Dow Jones Select Dividend Index seeks to represent the top 100 U.S. stocks by dividend yield. The index is derived from the Dow Jones U.S. Index and generally consists of 100 dividend-paying stocks that have five-year non-negative Dividend Growth, five-year Dividend Payout Ratio of 60% or less, and three-month average daily trading volume of at least 200,000 shares.

The Bloomberg Commodity Total Return Index, formerly known as Dow Jones-UBS Commodity Index Total Return (DJUBSTR), is composed of futures contracts and reflects the returns on a fully collateralized investment in the BCOM. This combines the returns of the BCOM with the returns on cash collateral invested in 13-week (three-month) U.S. Treasury Bills.

The Corporate Emerging Market Bond Index (CEMBI) is J.P. Morgan's index of U.S.-dollar-denominated debt issued by emerging market corporations. The Standard & Poor's Small Cap 600 Index (S&P 600) measures the small-cap segment of the U.S. equity market. The index is designed to track companies that meet specific inclusion criteria to ensure that they are liquid and financially viable.

Nasdaq 100 Index is an index composed of the 100 largest, most actively traded U.S. companies listed on the Nasdaq stock exchange. The U.S. Treasury 10-year Note is a debt obligation issued by the United States government that matures in 10 years. A 10-year Treasury Note pays interest at a fixed rate once every six months and pays the face value to the holder at maturity.

The Shanghai Stock Exchange (SSE) composite is a market composite made up of all the A shares and B shares that trade on the Shanghai Stock Exchange. Brent Crude is a major trading classification of sweet light crude oil that serves as a major benchmark price for purchases of oil worldwide. This grade is described as light because of its relatively low density, and sweet because of its sulfur content.

Employment Index: U.S. jobs with the exception of farmwork, unincorporated self-employment, and employment by private households, the military, and intelligence agencies.

A consumer price index (CPI) measures changes in the price level of a market basket of consumer goods and services purchased by households. The CPI is a statistical estimate constructed using the prices of a sample of representative items whose prices are collected periodically.

The “core” PCE price index is defined as personal consumption expenditures (PCE), prices excluding food and energy prices. The core PCE price index measures the prices paid by consumers for goods and services without the volatility caused by movements in food and energy prices to reveal underlying inflation.

The S&P/Case-Shiller Home Price Indexes are a group of indexes that track changes in home prices throughout the United States. The indexes are based on a constant level of data on properties that have undergone at least two arm’s length transactions.

The ISM Manufacturing Index is based on surveys of more than 300 manufacturing firms by the Institute for Supply Management (ISM). The ISM Manufacturing Index monitors employment, production, inventories, new orders and supplier deliveries. A composite diffusion index monitors conditions in national manufacturing and is based on the data from these surveys.

The ISM Non-Manufacturing Index is an index based on surveys of more than 400 non-manufacturing firms’ purchasing and supply executives, within 60 sectors across the nation, by the Institute of Supply Management (ISM). The ISM Non-Manufacturing Index tracks economic data, like the ISM Non-Manufacturing Business Activity Index. A composite diffusion index is created based on the data from these surveys, that monitors economic conditions of the nation.

Indices are unmanaged, and one cannot invest directly in an index. Index returns do not reflect a deduction for fees or expenses.
Important Disclosures

The information presented does not involve the rendering of personalized investment, financial, legal, or tax advice. This presentation is not an offer to buy or sell, or a solicitation of any offer to buy or sell, any of the securities mentioned herein.

The material contains forward-looking statements regarding intent, beliefs, or current expectations which are used for informational purposes only and do not reflect actual results. These statements are based primarily upon a hypothetical set of assumptions applied to certain historical financial information that has been provided by third-party sources and, although believed to be reliable, the information has not been independently verified and its accuracy or completeness cannot be guaranteed. The opinions, projections, forecasts, and forward-looking statements expressed are also valid as on the date of this document and are subject to change based on market and other conditions.

There are inherent risks with fixed income investing. These risks may include interest rate, call, credit, market, inflation, government policy, liquidity, or junk bond. When interest rates rise, bond prices fall. This risk is heightened with investments in longer duration fixed income securities and during periods when prevailing interest rates are low or negative.

There are inherent risks with equity investing. These risks include, but are not limited to, stock market, manager, or investment style. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

Investing in international markets carries risks such as currency fluctuation, regulatory risks, and economic and political instability. Emerging markets involve heightened risks related to the same factors, as well as increased volatility, lower trading volume, and less liquidity. Emerging markets can have greater custodial and operational risks, and less developed legal and accounting systems than developed markets.

Concentrating assets in the real estate sector or REITs may disproportionately subject a portfolio to the risks of that industry, including the loss of value because of adverse developments affecting the real estate industry and real property values. Investments in REITs may be subject to increased price volatility and liquidity risk; concentration risk is high.

Investments in below-investment-grade debt securities, which are usually called “high yield” or “junk bonds,” are typically in weaker financial health. Such securities can be harder to value and sell, and their prices can be more volatile than more highly rated securities. While these securities generally have higher rates of interest, they also involve greater risk of default than do securities of a higher-quality rating.

The yields and market values of municipal securities may be more affected by changes in tax rates and policies than similar income-bearing taxable securities. Certain investors’ incomes may be subject to the Federal Alternative Minimum Tax (AMT), and taxable gains are also possible.

Investments in the municipal securities of a particular state or territory may be subject to the risk that changes in the economic conditions of that state or territory will negatively impact performance. These events may include severe financial difficulties and continued budget deficits, economic or political policy changes, tax base erosion, state constitutional limits on tax increases, and changes in the credit ratings.

Yield to Worst – The lower of the yield to maturity or the yield to call. It is essentially the lowest potential rate of return for a bond, excluding delinquency or default.

Investments in emerging markets bonds may be substantially more volatile, and substantially less liquid, than the bonds of governments, government agencies, and government-owned corporations located in more developed foreign markets. Emerging markets bonds can have greater custodial and operational risks, and less developed legal and accounting systems than developed markets.
Important Disclosures (continued)

Investments in commodities can be very volatile, and direct investment in these markets can be very risky, especially for inexperienced investors.

Returns include the reinvestment of interest and dividends.

All investing is subject to risk, including the possible loss of the money you invest. As with any investment strategy, there is no guarantee that investment objectives will be met, and investors may lose money. Diversification may not protect against market risk or loss. Past performance is no guarantee of future performance.

Please see the Offering Memorandum for more complete information regarding the Fund’s investment objectives, risks, fees and other expenses.

Alternative investments are speculative, entail substantial risks, offer limited or no liquidity and are not suitable for all investors. These investments have limited transparency to the funds’ investments and may involve leverage which magnifies both losses and gains, including the risk of loss of the entire investment. Alternative investments have varying, and lengthy lockup provisions.

This information is not intended as a recommendation to invest in a particular asset class, strategy or product.

The information presented is for illustrative purposes only and based on various assumptions which may not be realized. No representation or warranty is made as to the reasonableness of the assumptions made or that all assumptions used have been stated or fully considered.

Estimated returns are based on multiple sources of historical market index data input into proprietary quantitative models specific to each asset class (e.g., equity, fixed income, etc.), then adjusted for fundamental inputs such as yield, earnings growth, risk premiums, valuation, historical reversion, and market implied expectations. Finally, we further adjust the estimated returns with our economic forecasts on market conditions and long-term expectations (which include economic growth, inflation, interest rates, among other important inputs).

Performance does not represent the results of actual trading, but was achieved by means of retroactive application of a model designed with the benefit of hindsight. Results may not reflect the impact that material economic and market factors might have on the adviser’s decision-making if adviser were actually managing client assets.

This document may contain forward-looking statements relating to the objectives, opportunities, and the future performance of the U.S. market generally. Forward-looking statements may be identified by the use of such words as; “expect,” “estimated,” “potential” and other similar terms. Examples of forward-looking statements include, but are not limited to, estimates with respect to financial condition, results of operations, and success or lack of success of any particular investment strategy. All are subject to various factors, including, but not limited to general and local economic conditions, changing levels of competition within certain industries and markets, changes in interest rates, changes in legislation or regulation, and other economic, competitive, governmental, regulatory and technological factors affecting a portfolio’s operations that could cause actual results to differ materially from projected results. Such statements are forward-looking in nature and involve a number of known and unknown risks, uncertainties and other factors, and accordingly, actual results may differ materially from those reflected or contemplated in such forward-looking statements. Prospective investors are cautioned not to place undue reliance on any forward-looking statements or examples. None of City National Rochdale or any of its affiliates or principals nor any other individual or entity assumes any obligation to update any forward-looking statements as a result of new information, subsequent events or any other circumstances. All statements made herein speak only as of the date that they were made.
Important Disclosures (continued)

All investment strategies have the potential for profit or loss; changes in investment strategies, contributions or withdrawals may materially alter the performance and results of a portfolio. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will be suitable or profitable for a client's investment portfolio.

References to indexes and benchmarks in hypothetical illustrations of aggregate returns do not reflect the performance of any actual investment. Investors cannot invest in an index and such returns do not reflect the deduction of the advisor's fees or other trading expenses. There can be no assurance that current investments will be profitable. Actual realized returns will depend on, among other factors, the value of assets and market conditions at the time of disposition, any related transaction costs, and the timing of the purchase. Indexes and benchmarks may not directly correlate or only partially relate to portfolios as they have different underlying investments and may use different strategies or have different objectives than our strategies or funds.
